

THINK BLUE BRIGADE

Project Ideas

1. Adopt a park or neighborhood and complete at least two cleanups of the area over the year (1 per semester).
2. Organize a group of volunteers to stencil storm drains on campus or around your school/local neighborhood.
3. Volunteer to clean up trash at a community event or fair.
4. Organize a club booth at a local community event or fair to educate the public about pollution prevention.
5. Set up a pollution prevention informational display at your school campus library or at a local library/recreation center.
6. Create a mural or develop an art exhibit that focuses on pollution prevention and display it on campus or at a local business
7. Create an interpretive sign about pollution prevention and post it at your school
 - a. Topics – The storm drain system, porous pavers, rain barrels, low water landscapes, watersheds, local creek or river near your school
8. Plant a community garden.
9. Create a short video or radio advertisement about pollution prevention and get it to run on school TV or the intercom during daily announcements – submit it to the City or a local non-profit or enter it into a contest.
10. Set up a school recycling program or organize a recycling drive, and set up collection bins around campus.
11. Organize an environmental fair on campus.
12. Organize a carpool or bike/walk to school day or create a campaign to encourage this all year long.
13. Organize a household hazardous waste collection event.
14. Research a storm water pollution prevention topic that is of interest to your group and give a presentations at another school (local Jr. High or elementary school)
15. Create and give a presentation or skit at a school assembly.
16. Create your own project to address the issue.

A CHANGE FOR THE BETTER BEGINS WITH YOU
